Project Sprint #1

The Solitaire game is described in CS449HomeworkOverview. You should read the description very carefully.

In this assignment, you aim to specify the requirements (i.e., user stories and acceptance criteria) of the target software that allows a human player to play a Solitaire game. These requirements will be fully implemented by the end of sprint 3. The minimum features include **choosing the board size and type, starting a new game**, **making a move, determining if a game is over**. The following is a sample GUI layout.

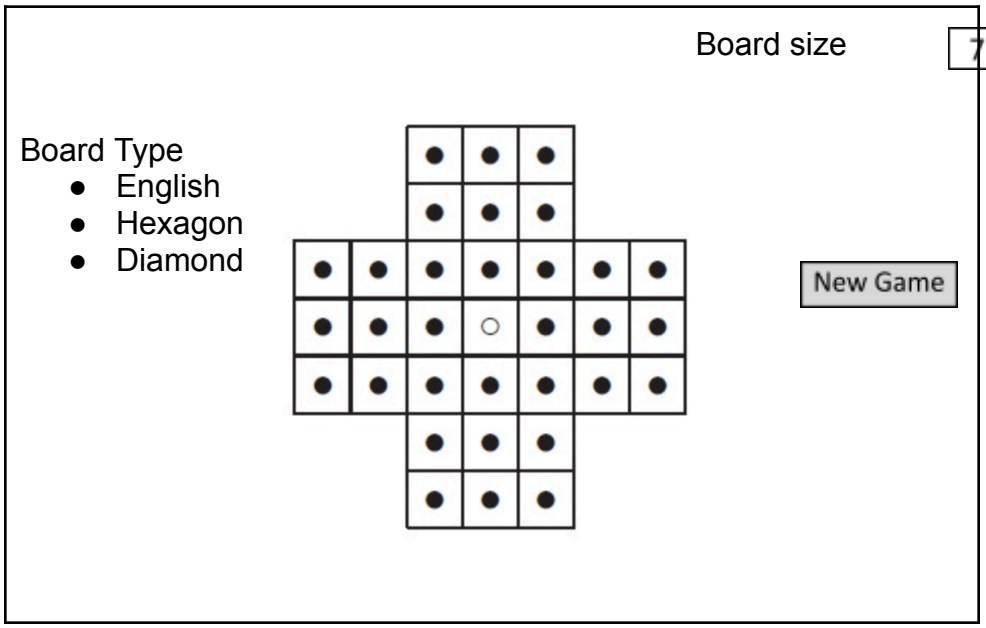

Figure 1. Sample GUI layout of the program by the end of Sprint 3

Use the following tables to document your user stories and acceptance criteria.

You are required to use the free ChatGPT or another LLM to complete two user stories and two of their respective acceptance criteria. You must ensure that the generated user stories are correct and fix them if not. At the end of the submission, provide screenshots of your LLM prompts and answers, along with the description of errors the LLM made that you had to correct. Points will be deducted if no screenshots/description are provided.

For the other user stories and acceptance criteria, you are not required to use LLM.

I. User Stories (3 points)

- **User Story Template**: As a <role>, I want <goal> [so that <benefit>]

ID	User Story Name	User Story Description	Priority	Estimated effort (hours)
1	Choose a board size	As a player, I want to choose the size of the game board so that I can play a game that matches my preferred level of complexity.	100	2
2	Choose the board type	As a player, I want to choose the type of game board so that I can play using my preferred board configuration.	100	2
3	Start a new game of the chosen board size and type	As a player, I want to start a new game of the board size and type, So that I can begin the game of peg solitaire	100	2

ID	User Story Name	User Story Description	Priority	Estimated effort (hours)
4	Make a move in a game	As a player, I want to make a move in a game, So that I can make progress in the game	100	2
5	A game is over	As a player, I want to be able to end a game, So that I know when I have won the game	100	2

II. Acceptance Criteria (AC) (12 points): Add/delete rows as needed.

User Story ID and Name	AC ID	Description of Acceptance Criterion	Status (Completed, To Do, In Progress)
1. Choose a board size	1.1	AC 1.1 Display available board sizes ● **Given** the player is configuring a new game ● **When** the player views the board size options ● **Then** the system displays all available board sizes	In Progress
	1.2	AC 1.2 Select a board size **Given** the player is configuring a new game **And** multiple board sizes are available **When** the player selects a board size **Then** the selected board size is clearly indicated as selected	To do
	1.3	AC 1.3 **Change the selected board size** ● **Given** the player has selected a board size ● **When** the player selects a different board size ● **Then** the previously selected size is deselected ● **And** the newly selected size is indicated as selected	To do
	1.4	AC 1.4 **A board size must be selected** ● **Given** the player is configuring a new game ● **And** no board size has been selected ● **When** the player attempts to continue ● **Then** the system prevents the player from continuing ● **And** the system indicates that a board size must be selected	To do
2. Choose the board type	2.1	AC 2.1 **Display available board types** ● **Given** the player is configuring a new game ● **When** the player views the board type options ● **Then** the system displays all available board types	To do
	2.2	AC 2.2 **Select a board type** ● **Given** the player is configuring a new game ● **And** multiple board types are available ● **When** the player selects a board type ● **Then** the selected board type is clearly indicated as selected	To do
	2.3	AC 2.3 **Change the selected board type** ● **Given** the player has selected a board type ● **When** the player selects a different board type ● **Then** the previously selected board type is deselected ● **And** the newly selected board type is indicated as selected	To do

User Story ID and Name	AC ID	Description of Acceptance Criterion	Status (Completed, To Do, In Progress)
3. Start a new game of the chosen board size and type	3.1	AC 3.1 Initialize the game board **Given** the player selected a board size **And** the player selected a board type **When** the player has selected a board size and type and starts a new game **Then** create a new gameboard with all spots filled except the spot in the middle	To Do
4. Make a move in a game	4.1	AC 4.1 The player selects a piece to move **Given** the player has not selected a piece **And** the board still has contiguous pieces **When** the player selects a piece which can "jump" a contiguous piece to go into an empty space on the board **Then** the piece is selected to be moved	To Do
	4.2	AC 4.2 The player selects a location for the piece **Given** the player has selected a piece to move **When** the player has selected a location for the piece to move **And** the location an empty spot one spot away from the chosen piece to be moved, jumping over another piece **Then** that location is selected	To do
	4.3	AC 4.3 The piece will move **Given** the player has selected a piece and selected a location for the piece **When** the player has selected the location for the piece **And** the piece moves **Then** the selected piece will move to the selected location for the piece	To do
5. A game is over	5.1	AC 5.1 The game ends with a win **Given** the player has moved a piece **When** that piece the player moved is the last piece on the board **Then** the player wins the game	To do
	5.2	AC 5.2 The game ends with a loss **Given** the player has moved a piece **When** there are no contiguous pegs **Then** the player loses the game	To do
